

PZ 100 RL

The PZ 100 RL is the pellet heating with a great nominal capacity, especially designed for housing estates, enterprises, municipal establishments and hotels. Perfect combustion is ensured via lambda probe and air mass sensors. The heating offers a fully automatic heat exchanger and burner cleaning with a generously dimensioned ash container. The pellets are transported via our proven suction technique from the storage room to the pellet container.

Our system offers a CAN-BUS capable microprocessor control and a remote maintenance via internet with appropriate PC software! Up to 16 regulated heating circuits can be activated.

Unique!

- Power supply line 230 VAC, 50 Hz
- gentle pellets transport by proven suction technique

PZ 100 RL

Dimensions:

Boiler height	1882 mm
Total height*	2065 mm
Flow	581 mm
Return	1475 mm
Flue tube connection	front/top
Boiler width	1519 mm
Total width**	1875 mm
Boiler depth	1212 mm
Total depth***	1460 mm
Capacity	30-99 kW
Flue tube connection	∅ 200 mm
Electric connection	230 VAC / 50 Hz / 16 A

* incl. induced draught ** incl. ash container

*** incl. heat exch. cleaning
